

# The FoodEx2 classification system and guidance on its harmonised use

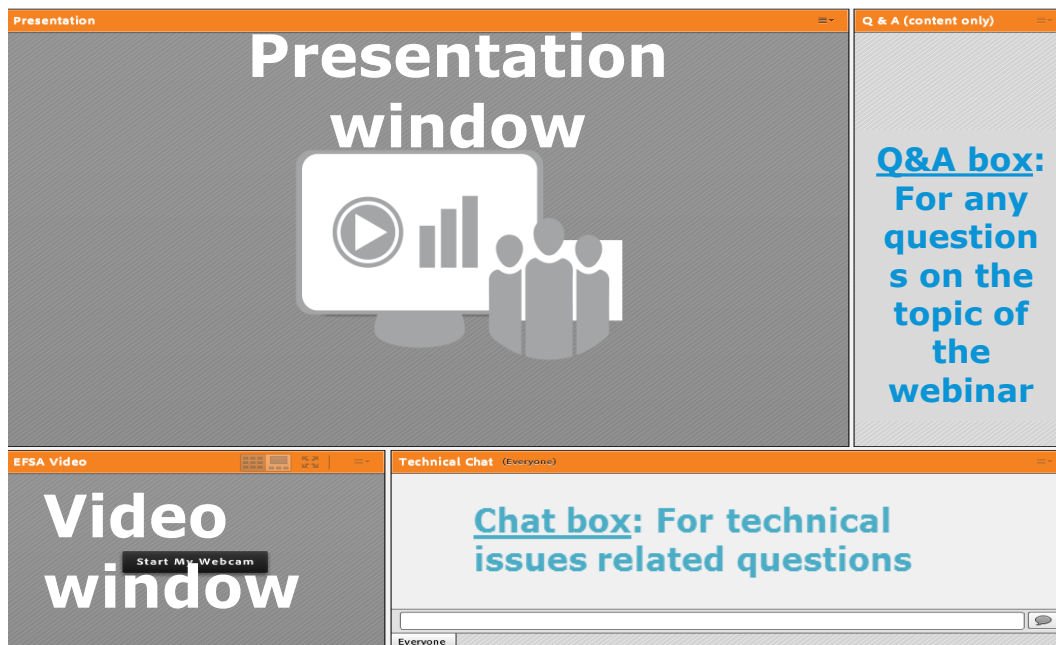

## Webinar 2

**Sofia Ioannidou**  
**Alban Shahaj**  
**Laura Kirwan**

3 October 2018

# FoodEx2 Webinar - GUIDE TO ATTENDEES

- This webinar **is being recorded!**
- The webinar **is in English** and questions should be submitted in English.
- You are automatically connected to the audio broadcast. One-way audio (listen only mode)

## Section 2

# Advanced FoodEx2 functions FoodEx2 coding examples

## Section 2.1

# Introduction to FoodEx2 facets

# Facets

**Facets** are descriptors providing additional information for a particular aspect of a food

Implicit facets (already assigned)

Added facets (while coding a food item)

**28 Facets in total**

Examples:

F01 Source

F27 Source commodities

F04 Ingredient

F28 Process

# Facets

**Facets** are descriptors providing information for a particular aspect

Implicit facets (already assigned)

Added facets (while coding a product)

**28 Facets in total**

Examples:

F01 Source

F27 Source commodities

F04 Ingredient

F28 Process

-  [F02] Part-nature
-  [F01] Source
-  [F27] Source-commodities
-  [F28] Process
-  [F04] Ingredient
-  [F06] Surrounding-medium
-  [F08] Sweetening-agent
-  [F09] Fortification-agent
-  [F10] Qualitative-info
-  [F17] Extent-of-cooking
-  [F26] Generic-term
-  [F21] Production-method
-  [F18] Packaging-format
-  [F19] Packaging-material
-  [F03] Physical-state
-  [F07] Fat-content
-  [F11] Alcohol-content
-  [F12] Dough-Mass
-  [F20] Part-consumed-analysed
-  [F22] Preparation-production-place
-  [F23] Target-consumer
-  [F24] Intended-use
-  [F25] Risky-Ingredient
-  [F29] Purpose-of-raising
-  [F30] Reproductive-level
-  [F31] Animal-age-class
-  [F32] Gender
-  [F33] Legislative-classes

# FoodEx2 coding

Base term: **A032J** is the code for

“White sugar”

A unique five-character alphanumeric code

Facet: **F04.A032J** means

“ingredient = white sugar”

# Example

Tomato basil and garlic sauce in a glass jar

## FoodEx2 description

Base term: Tomato-containing cooked sauces

### Facets:

Ingredients: basil, garlic

Processing: jarring, pasteurization

Packaging format: jar

Packaging material: glass

## FoodEx2 coding for tomato sauce

**Base term** followed by `#` and a sequence of **facet descriptors** separated by `\$`

**Tomato-containing cooked sauce, with basil and garlic, in a glass jar**

**A044C**#F04.A00GZ\$F04.A00VV\$F28.A07HV\$  
F28.A0BYP\$F18.A07NN\$F19.A07PF

# Most important facets (1)

## Source (F01) Source-commodities (F27) Ingredient (F04)

Are related to the distinction of the different types of food

- Raw primary commodity
- Derivative
- Composite food

Represent the answer to the question:

‘from what this food has been obtained?’

## Most important facets (2)

### **'Source' (F01)**

defines the origin of raw commodities  
Usually already assigned as implicit facet

### **'Source-commodities' (F27)**

defines the origin of derivatives

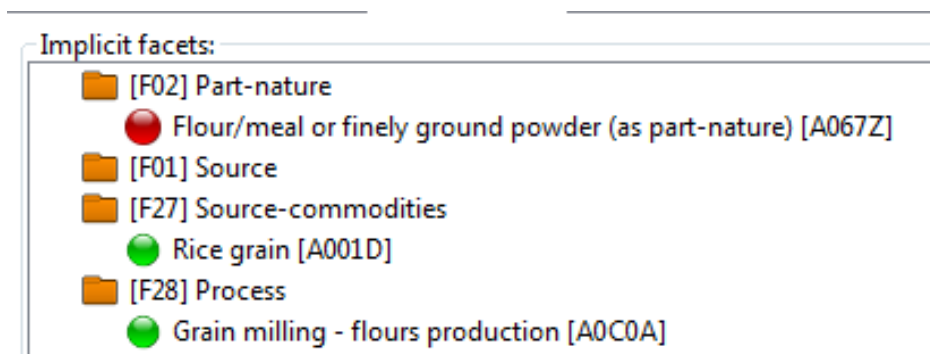

### **'Ingredient' (F04)**

defines the origin of composite food

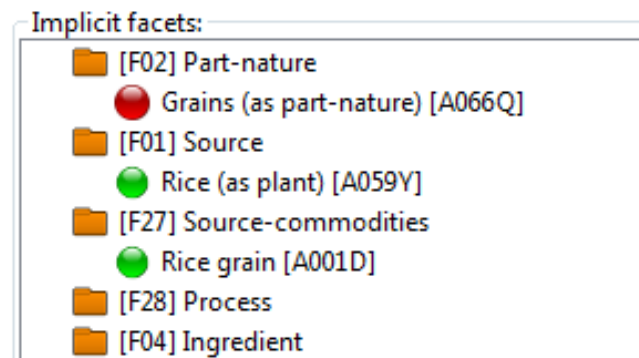

# Example

Derivatives are produced from a raw commodity and the raw commodity itself is produced from a live plant

➤ **Rice flour**  
produced from rice grain by applying a milling process

➤ **Rice grain**  
produced from rice plant

# Example

- **Fish salad** is made with canned herring (Ingredient - F04)
- **Canned herring** is produced from herring fish (Source commodities - F27)
- **Herring fish** is obtained from the *Clupea* spp. (Source -F01)

## Section 2.2

### Coding special cases

## Don't find a reported/analysed food?

**Why?** So far, the food has not been considered for inclusion or it was deemed of minor relevance

**Solution:** use the nearest upper level group specifying the additional information with facets

# A derivative is missing? (1/2)

## If the treatment does not change the nature of the food

Two steps to follow:

- Use the raw primary commodity as base term
- Specify the treatment as a facet

## A derivative is missing? (2/2)

**If the treatment changes the nature of the food and the raw primary commodity is available**

- Choose as base term the nearest generic food group
- Assign under the **source-commodities facet (F27)** the suitable source commodity

# A composite food is missing?

- Choose the correct 'branch'
- Within this branch, choose a base term that is similar to the product being coded
- Provide the ingredients using the ingredient facet (F04)
