

# Applications helpdesk – New active substances applications workflow

The marketing and use of pesticides is covered by Regulation EC 1107/2009. The specific data requirements for applications are contained in Regulation EU 283/2013 and Regulation EU 284/2013. The rules specify a comprehensive risk assessment and authorisation procedure for active substances and products containing these substances. Applicants are obliged to provide data showing that a substance can be used safely with respect to human health, animal health and the environment.

Regulation EC 1107/2009
