

EXECUTIVE DIRECTOR OFFICE

CLARIFICATION N°4

Call reference: GP/EFSA/ED/2022/01

Call title: NAM projects in the areas of AOP development and transcriptomics for risk assessment

Question: I'm interested in participating in a consortium to apply to the call with reference: GP/EFSA/ED/2022/01. Can you help me in finding research groups interested in the preparation of a proposal?

Answer:

Applicants may search for a consortium partner through:

1) their designated Article 36 Organization's contact person who can access the contact details of other organizations included in [the Article 36 database](#).

and/or

2) their respective EFSA national Focal Point. EFSA national Focal Points have the role to support and facilitate the creation of consortia acting as a networking interface between national organizations (e.g. having access to EFSA databases of contacts, project ideas and other networking activities facilitating MS engagement in fields of EFSA's remit).

Contact details of the national Focal Points are available on the EFSA website [here](#).
