

PLANNING, TRANSFORMATION AND TECHNOLOGY UNIT

## Note to Management Board

### **Implementation IT operational strategy**

Since its adoption in 2013, the Management Board asked for an early update on the IT Strategy to be delivered to the Audit Committee and the members of the Board in the Public session, during the December meetings.

This presentation gives an oversight of the performance and execution the IT Strategy and shows its continuous business alignment with the EFSA Strategy 2020, adopted by the Board in March 2016, supporting Openness, Cooperation and Transparency through technology.

The IT Strategy is now fully integrated in EFSA's multi annual work programme. The IT mission remains to help prepare for future risk assessment challenges by leveraging technology and transforming traditional workflow and knowledge management on modern software platforms.
