**Subject: Letter dated 6 May 2009 on the renewal of maize MON810**

Dear Minister,

Thank you for your letter dated 6 May 2009 in which you raised some scientific issues regarding the risk assessment related to the renewal of maize MON810.

I am pleased to confirm that, during our evaluation process, EFSA has received many valuable comments from national risk assessment bodies through our consultative mechanism, the GMO EFSA-net. You can rest assured that both the staff and the EFSA GMO Panel have been thoroughly considering these important issues in the context of the different safeguard clauses for the MON 810 applications and it is indeed an EFSA standard operating procedure to analyse current literature and comments from Member States during the risk assessment of applications.

Notwithstanding the above, in the spirit of cooperation with Member States, EFSA will now invite national GMO risk assessment experts designated by the members of EFSA's Advisory Forum to a scientific meeting with the environmental experts of the EFSA GMO Panel to address the issues you have raised in your letter. The objective of such a technical meeting is to exchange views on scientific argumentation underlying the concerns that you and your colleagues Ministers raised in your letter. The meeting which will be organised under the auspices of EFSA's Advisory Forum will take place at EFSA's premises in Parma, Italy on May 26. A full report of the meeting outcome will be made available to the EFSA GMO Panel in the context of the renewal application of maize MON810.

In accordance with its founding regulation, EFSA is committed to transparency and openness. Thus our exchange of letters and all related documents and in particular the report of the above mentioned meeting will be made available to the public on our website.

We thank you for your interest in EFSA's work with respect to GM risk assessment and remain at your disposal.

Yours sincerely,

Catherine Geslain-Lanéelle

**Subject: Letter dated 6 May 2009 on the renewal of maize MON810**

Dear Minister,

Thank you for your letter dated 6 May 2009 in which you raised some scientific issues regarding the risk assessment related to the renewal of maize MON810.

I am pleased to confirm that, during our evaluation process, EFSA has received many valuable comments from national risk assessment bodies through our consultative mechanism, the GMO EFSA-net. You can rest assured that both the staff and the EFSA GMO Panel have been thoroughly considering these important issues in the context of the different safeguard clauses for the MON 810 applications and it is indeed an EFSA standard operating procedure to analyse current literature and comments from Member States during the risk assessment of applications.

Notwithstanding the above, in the spirit of cooperation with Member States, EFSA will now invite national GMO risk assessment experts designated by the members of EFSA's Advisory Forum to a scientific meeting with the environmental experts of the EFSA GMO Panel to address the issues you have raised in your letter. The objective of such a technical meeting is to exchange views on scientific argumentation underlying the concerns that you and your colleagues Ministers raised in your letter. The meeting which will be organised under the auspices of EFSA's Advisory Forum will take place at EFSA's premises in Parma, Italy on May 26. A full report of the meeting outcome will be made available to the EFSA GMO Panel in the context of the renewal application of maize MON810.

In accordance with its founding regulation, EFSA is committed to transparency and openness. Thus our exchange of letters and all related documents and in particular the report of the above mentioned meeting will be made available to the public on our website.

We thank you for your interest in EFSA's work with respect to GM risk assessment and remain at your disposal.

Yours sincerely,

Catherine Geslain-Lanéelle
